mydoorview

Flexible video intercoms for any entrance

The VUE-7 goes beyond the standard capabilities of a modern door intercom, offering a range of advanced features to enhance your building's security and convenience. Visitors can easily select their contact by name, streamlining the communication process. If the primary contact is unavailable, the system automatically offers alternative options, such as a colleague from the same group, a mobile number, or other predefined contacts, ensuring seamless connectivity every time.

Features

Multi-Unit Door Entry System

Exterior-rated call box for residential, multi-family, and commercial applications

SIP/IP calling via POE

A single POE connection is used to provide data and power to the VUE-7 panel. An alternate 12V input is also included for longer wire distances.

Video Calling to Phones, Tablets and PCs

Residents can view who is at the door and release the door-lock from the app, giving access to the visitors. With one-way video, two-way voice, visitors will not be able to see the resident, but the resident will see the visitor.

Logging and Reporting

The resident app and management portal display images of all pin uses and five second videos of all video calls with the date, time, and name of resident called. All data is stored for 90 days and can be exported.

Group Calling

One call from the panel can dial every person in a group. Residents are able to create groups in the app.

Stand-Alone Operation

Built-in or external card readers can be used. PIN codes are programmable from the app and will still continue to function in the event of a network loss.

No Limits

There are unlimited users, unlimited usage, and unlimited panels per property.

PINs

Residents can send an entry pin to a guest via text from the MyDoorView app.

Built-in Card Reader

The built in card reader can be used for stand-alone operation

External Weigand input

For added door or long range reader at vehicle gate.

Door and Gate Control

Residents can swipe to open one or more doors from the app. No other credential is needed.

Anti-glare Tempered Touch Glass

The panel has a matte finish that reduces glare, resists fingerprints, and supports gloved hands.

Multi-Purpose Mounts

There are multiple mounting options for any location; including flush mount, surface mount and rain hood.

Elevator Controls

Up to 64 Floors

License Plate Reader – ALPR

Residents and guests can use their license plate as their credential.
